Education

Bachelor - Computer Sciene and Engineering,	09/2020 – 11/2023
UBT University for Sciene and Bussines - https://www.ubt-uni.net/en/home/	Prishtinë, Kosovo
Excellent experience	

Professional Experience

Web Development Specialist	05/2020 – 2024
	Prishtinë, Kosovo

Over the last four years, I have passionately delved into the world of web development and software engineering, dedicating my time and expertise to a series of self-initiated projects. Embracing the intricacies of this field, I've meticulously designed, developed, and managed a range of dynamic and sophisticated websites.

My journey in this domain has been a hands-on, self-driven adventure, with evenings dedicated to advancing my knowledge and skills in web development technologies. Experimentation and implementation have been central to my approach as I continuously sought to learn and integrate new tools, frameworks, and innovative solutions.

My expertise lies in crafting intricate and dynamic websites, showcasing not only a strong grasp of technical complexities but also a keen eye for user experience and design. With a firm foundation built over three years of consistent practice and project execution, I am enthusiastic about redirecting my focus toward new professional opportunities in web development and software engineering. I am eager to bring my skills to fresh challenges, leveraging my comprehensive experience to contribute to innovative projects in this ever-evolving field.

Skills

HTML5/CSS3/Bootstrap/Material-UI
Excellent Structure/Professional Design

MERN Stack
Proficient in the MERN Stack (MongoDB, Express.js, React, Node.js) with 2+ years of practicing.
Extensive work on end-to-end development of web applications, from database design and API creation to responsive user interfaces.
Strong knowledge of state management in React using Redux or Context API.
Skilled in optimizing and fine-tuning performance, including server-side rendering and code splitting.
Competent in database administration, including MongoDB indexing and query optimization.
Proficient with authentication and authorization mechanisms for secure application access.
Adept at deploying applications.
Proactive problem solver and continuous learner, staying up-to-date with MERN Stack technologies and trends.

Java
Highly skilled and detail-oriented Java Developer with a comprehensive understanding of Java programming from university-level courses to advanced concepts. Adept at object-oriented programming, inheritance, and other key Java principles. Proven ability to design, develop, and maintain robust software applications.

Javascript
Experienced in modern JavaScript, utilizing ES6+ features and package managers (npm, yarn).

Vue Js
Proficient in Vue.js 3, a modern and popular JavaScript framework for building user interfaces.
Extensive experience in developing dynamic and responsive single-page applications (SPAs).
Strong command of Vue's reactive data binding and component-based architecture.
Skilled in state management using Vue's reactivity system and Vuex for complex applications.
Competent in routing with Vue Router and interaction with external APIs via Axios.
Proficient in optimizing performance and rendering efficiency with Vue's virtual DOM.
Capable of developing custom directives, filters, and mixins for advanced functionality.
Collaborative team player with the ability to work on cross-functional projects.
Strong problem-solving skills and a dedication to delivering high-quality user experiences.

WordPress
Create a separate section for technical skills and list relevant CMS-related skills, such as:
WordPress Theme Development
Plugin Customization
HTML, CSS, PHP
Responsive Design
Content Management

Languages

Albanian   **English**   **Swedish**
                                                                conversationally

Projects

SwedenSpectra   2023 – present
Incorporating extensive interactivity features such as likes and comments for user engagement in the MERN Stack web application, alongside a robust security framework, ensuring a safe and interactive space for individuals, with a particular focus on the community in Sweden, to share and celebrate their memories through images, videos and a lot of others interactivity.

myPortfolio   10/2022 – 01/2023
Creating static React SPA using EmailJS Library for visitor of my site to send me emails, Hosting it, and making it accessible via privately purchased domain.

http://arbnormiftari.com/

EventLink   2023 – 2023
Creating the Frontend part and reusable components

TechBlogs   2022 – 2023
Frontend Development with Firebase Integration and State managment using Vuex
and some backend development using Express js.

nodeApi   2022 – 2022
Just practicing Endpoints creation using Express js with Node and MongoDB as
Database and endpoint testing using Postman.

Certificates

Web Design
This certificate was from ICK, in
my beginnings in this field(
Innovation Centre Kosova)
https://www.ickosovo.com/

**Computer Science and
Engineering**
UBT University,
For succes shown during the
studies.
